

## **Reflection note – Elsa**

### **Personal contribution**

Overall, I am pleased with the deliverables. Our group has work targeted from day one, and I think the group dynamic has been good.

When we were discussing the project, I took part in the discussion. I could have been more investigated in what other members did, but I felt like I trusted their competence.

I did the tasks I was assigned and took charge of creating the graph with notes with help from the team.

### **What we could have done better**

The team had some discussions, and we used a good amount of time on this. In further projects we could save time cutting through these discussions and agree to disagree. I have learned a lot during this project by working with other people, and I enjoyed the task.
